

AVAKIBA

KITCHEN | BATH | HOME

Introduction

- Avakiba Inc. Is a New York based company with its main office and showroom located in Manhattan Beach, Brooklyn. We have partnered with AG Team of Tbilisi, Georgia, as an exclusive agent to facilitate custom kitchen fabrication solutions on a commercial scale for North America.
- AG Team has been fabricating custom kitchens and custom millwork since 2006 and has produced over 2 million square feet of custom cabinetry. The quality of their craftsmanship is what has made AG Team the premier choice for custom kitchen and home furniture fabrication in Tbilisi and the surrounding regions, including those within the EU.
- Avakiba Inc. has the capability to fabricate roughly 2,500 custom kitchens per year with plan to expand in 2024.
- In addition to kitchens, Avakiba Inc., in partnership with the AG Team, can fabricate any type of custom home furniture, including bathroom vanities, custom closets, wall units, doors, and other wood crafting projects. Avakiba has fabricated custom furniture for hotels, restaurants, and various commercial spaces.

Kitchens

Each kitchen fabricated undergoes rigorous testing for quality control, and the materials used exceed eco-friendly standards upheld in the United States, the EU, and all other regions. AG Team has the capability to fabricate any type of style and finish.

Avakiba contemporary

Avakiba Inc. has developed a contemporary kitchen design that can be easily incorporated into any modern home building. Contemporary kitchen design is characterized by sleek, clean lines and a minimalist approach. The palette typically revolves around monochrome or neutral colors, which are complemented by bold splashes of color or texture to create a modern, yet timeless ambiance.

- 14 Linear feet as shown
- White Acrylic MDF kitchen door design ¾" (Kronospan)

- Schwinn Handle-free hardware L-Channel
Part #3914-290
- Schwinn Handle-free C3 Series 114-1/8" (2899mm) Aluminum C-Channel
Part #SCW-59243
- 3-year factory warranty*

Avakiba traditional

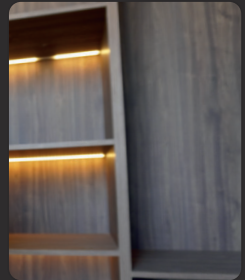

The second most popular kitchen design developed by Avakiba Inc. is a classic design. Classic kitchen design aims for a timeless look, often incorporating elements that have stood the test of time. This style is defined by its elegant simplicity, harmonious proportions, and attention to detail. Rich, natural materials like wood and stone are commonly used, bringing warmth and texture to the space.

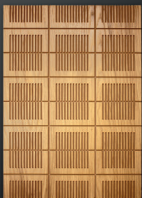

- 28 linear feet as shown
- Painted MDF kitchen door design ¾" (Kronospan)

- 3-year factory warranty*

Home and commercial spaces

Avakiba Inc. is capable of manufacturing cabinetry for various needs, including those for home and commercial spaces. Below is a selection of our completed projects.

Customized Design Solutions

STRATOBLEND DOOR

Where Elegance Meets Innovation.

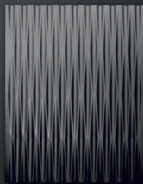

The distinctive design is a symphony of vertical and horizontal stripes, harmonizing to create a captivating visual rhythm. Crafted to transcend conventional boundaries, this door is a testament to the limitless possibilities of design.

GEOMETRIX DOOR

Where Artistry Meets Symmetry.

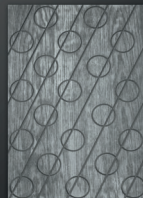

This door introduces an enchanting array of geometric square patterns that captivate the eye without overpowering the harmony of the space. The symmetrical arrangement exudes a balance that exquisitely complements its surroundings, whether your decor leans towards minimalist chic or contemporary opulence.

ELEGIWAVE DOOR

Where Sharp Sophistication Meets Sublime Softness.

This door presents an exquisite balance between sharp, defined edges and the gentle undulations of a wavy relief. The result is a stunning visual masterpiece that seamlessly marries sharpness with soft transcendence.

CIRCLINE HARMONY

Where Serenity Meets Structure.

The Circline Harmony door style marries elegance with contemporary design, featuring an exquisite array of cut-out circles seamlessly integrated with parallel lines. Crafted for those who appreciate the harmony between art and functionality, the Circline Harmony door transforms any entryway into a portal of modern beauty.

Quality Control and Product Features

AG Team has built a reputation for upholding the highest standards of quality for its clients. In addition to using state-of-the-art equipment, the materials sourced from Georgia have passed 19 sets of sanitary and environmental tests. In contrast, materials from China and many other regions that are sold in the US often contain toxins and carcinogens.

The primary materials used include MDF, TFL, LHDF, and HPF, all of which are environmentally friendly and safe for household use

All materials have emissions of less than 1% toxic chemicals, ensuring safety and no harm to human health

European quality certificates validate their safety and usability, a validation that is further confirmed in the United States

The cabinets are crafted with precision, cutting, grinding, milling, and hole creation.

During mass production, every 10th kitchen fabricated is assembled for an added layer of quality control.

Packaging is performed on site and handled with the highest of care to ensure they arrive in pristine condition. We take great care in packaging to prevent any damage during transportation.

Avakiba Inc. imported kitchens from The Republic of Georgia meet ALL U.S. safety and regulatory standards.

We offer a 3-year manufacturer warranty on every kitchen or home furniture product we fabricate. Other brand name components used in the fabrication process may offer extended warranties.

We offer limitless design possibilities, ensuring your creative vision comes to life. Choose from over 100 wooden and lacquer colors to achieve the perfect aesthetic for your project.

We accommodate your preferences by offering various hardware mechanisms, ensuring that every detail aligns with your project's unique requirements.

Leverage our digital sample database to streamline your project planning process. Easily integrate our samples into your design concepts, saving time and effort.

Other Services

Avakiba Inc. has developed a comprehensive network of affiliates offering a suite of services including design, installation, and the provision of stone slabs and tiles to meet the diverse needs of developers. In addition, as the exclusive North American agent for AG Team, Avakiba Inc. oversees all domestic logistics from the moment containers arrive at the chosen port.

DESIGN

Every project begins with an idea. Avakiba Inc. Has a network of dedicated designers ready to take an idea and make it visible using cutting edge software and decades of experience working with single family residence projects as well as commercial developments or multi-unit high rise condominiums.

STONE SLABS AND TILES

Avakiba Inc. Is a distributor of Laminam tiles and are listed on their website as an existing showroom. Laminam tiles are a high-end solution for floors, countertops, backdrops and exterior surface cladding.

INSTALLATION

Avakiba Inc. Has a staff of assemblymen and installers with decades of experience in the Tri-State area ready to tackle any install.

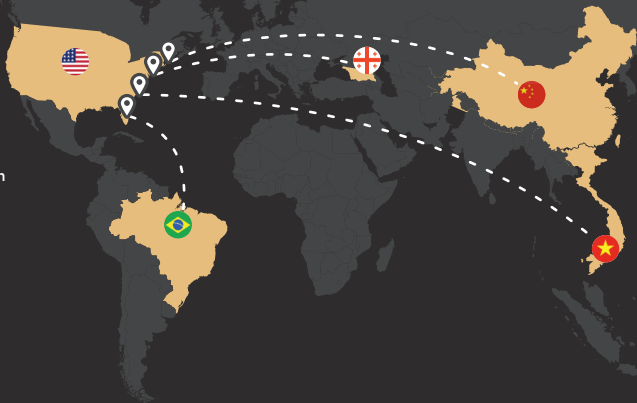

FINAL MILE DELIVERY

Avakiba Inc. Has a long-standing partnership with a logistics company in NYC that can provide last mile delivery.

Shipping Logistics and Delivery

One of the most important aspects of completing a project on time is shipping logistics. Avakiba Inc. has a long-standing partnership with a logistics company in New York. Our partners, AG Team, have a similar relationship with a logistics broker in Tbilisi. By pooling the resources of both companies, we will provide an economical and stress-free logistics solution.

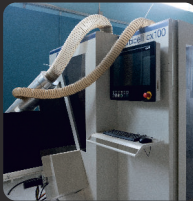

- The Republic of Georgia has a Free Trade Agreement (FTA) with the United States. Under this agreement, certain products, including kitchen cabinets, are qualified for reduced or zero tariffs. This can lead to substantial cost savings compared to countries without FTAs.
- Delivery times vary with project scope. Typically, a 3-4-month lead time is required.
- Our US shipping team is expertly led by our valued partners, ensuring efficient and reliable delivery services.

Machinery and Equipment

AG Team currently operates a wide array of heavy-duty equipment imported from Italy. These machines are able to produce precise results and an incredible finish. Below is a list of equipment at our facility.

Moulder Minimax TW55ES	SCM
